

Newstead Garden Management has grown over the past 20 years out of a passionate personal interest in gardens and a genuine love of nature itself by its founder, David Newstead-Bishop.

As a company it now undertakes a variety of garden work, from regular lawn care to ongoing maintenance and general garden upkeep. We will also undertake fencing, hedging, paving and most other garden projects that you might have in mind.

Our contracts range from small suburban gardens, through to flats, schools and estates. We offer the same personal service to all our clients whatever the size of your garden.

Newstead Garden Management staff are chosen to ensure that they have both honest and pleasant personalities and a true interest in horticulture and nature. You will find that they are easy to approach and are pleasant to have around. They are knowledgeable, helpful and happy to oblige.

We adhere to a strict ban on the use of bad language, take the security of your property and garden very seriously and also maintain strict client confidentiality at all times.

Newstead Garden Management welcomes your enquiries and David will be personally available to discuss any projects you may have. Arrangements can be made for weekend or evening consultations.

NEWSTEAD

Garden Management

We would welcome the opportunity to discuss your garden plans and projects with you. We can make your garden dreams come true.

Why not call us on the freephone number below for a friendly discussion and no obligation estimate?

NEWSTEAD

Garden Management

Specialists in the restoration & development of fine gardens

We offer a complete range of services, from single makeovers & lawn care through to a total garden re-design

Call Freephone 0800 328 9184

Maintenance 🌿

Long-term regular maintenance visits are available to suit your requirements and budget, whether you need a total estate management service or modest partial care of your lawn and garden, we are available to help.

Planting 🌿

Benefit from our wide horticultural knowledge. All forms of planting are undertaken, from cheerful bedding plants in spring through to a complete replanting, perhaps with mature trees and shrubs or maybe young and semi-mature plants.

Makeovers 🌿

A term we use for a garden in need of some serious attention. This is usually undertaken as a daily project until completed, conducted as a single operation with no follow on work. This would not normally include hard landscaping.

Design service 🌿

Quality hand drawn and technical garden designs. Projects undertaken to date include public, commercial and private gardens both in the UK and other European countries. See our website.

Lawns 🌿

Most lawn problems can be corrected over time, with regular cutting, scarifying and treatments for weeds and moss. We can also completely re-lay a new lawn for you.

Ponds 🌿

A limitless range of ideas. Let your imagination run wild. Ponds and water features can be as creative as the mind behind the idea itself.

Hedging 🌿

We undertake a wide variety of hedge work, from the regular cutting and re-shaping of existing hedges to the planting of new ones.

Jet washing 🌿

We are able to clean and renovate most stone, paved or brick paths, driveways and patios, often to dramatic effect.

Fencing 🌿

We can service most types of fencing requirements, from standard timber boundary fencing, chain link through to field and stock fencing.

Landscaping 🌿

We can create a range of effects using brick, stone and paving materials to contrast with the natural beauty of the planted areas of your garden.

Rockeries 🌿

Rockeries are both decorative and a great way to encourage small animals into the garden, especially if used within the vicinity of a pond.
